

SHAKE YO HELMET

#17 SEBASTIAN BALTHASAR

SEBASTIAN I chose these colours because I especially like green because I like the environment, whilst the neon orange is the colour of our company sponsor. Within the design it also looks a bit like a devil at the front which I like. I also have my sisters name on the back of my helmet as a surprise for her as she's always been there supporting me.

NELSON Helmet design is a very personal thing to me and fun to work with my brother designing them. My Uncle paints

our helmets too rather than a professional to keep it within the family. In the blue top the design with the lines has the "M" for my surname Mason and a "J" for my middle name John. The colour red is to represent my nationality of Canada with the maple leaf on the back. The "X" on the back is for my cousin who passed away a few years; he always supported me and my brother so it's homage to him. People tell me I can't wear green so I decided to have it within my

helmet design since it's one of my favourite colours.

RICCARDO I have ladybirds on the top of my helmet as when I was in karting, my Mum found a ladybird and put it with me when I was racing and most of the time I won races so it seemed as if it brought me luck. My helmet is quite simple, the colours are important to me as I like to be recognised and every year you change your car number unlike motorbikes so the helmet is an important identity.
